IEEE Tech Talk
The DARPA UPSIDE and Cortical Processor Programs

PSU professor Dan Hammerstrom will discuss two programs he started and ran at DARPA, both of which have different degrees of neural inspiration. These programs provide potential solutions for efficient processing of the massive amount of data at society’s fingertips.

Come join the IEEE Student Branch as we explore the cutting edge research carried out by PSU faculty.

Coffee and donuts provided by IEEE Students

When: Friday, May 17th 1-1:45 PM
Where: Fourth Avenue Building (FAB) Room 10

IEEE Students invite you!
